## AWARDS

Cambridge Advanced  
English / Diploma  
JUNE 2018

IT Award / Diploma  
JUNE 2017  
I was chosen as the best  
IT student

## ABOUT ME

I'm a curious being who always wants to learn more. Prototyping is my favourite part of design – from creating lo-fi wireframes to interactive prototypes.

These last years I've worked with both UX and UI, and learnt that I enjoy the full process from brainstorming ideas all the way to delivery.

## WORK EXPERIENCE

### Visuals and UX Designer / Bantaba

SEP 2021 – AUG 2022, STOCKHOLM (Hybrid)

As the **sole designer** for Bantaba, Africa's largest startup-diaspora community, I played a crucial role in the overall design process. For instance, I:

- Independently conducted user **research** using different methods to improve the UX of the **platform**.
- Designed the **landing page** from scratch in collaboration with the CEO and Content Strategist.
- Created and followed a brand **style guide** to keep the designs consistent.

These tasks taught me how to take **ownership** of a project and deliver **high-quality** results in a **fast-paced** environment.

### Reference:

CEO at Bantaba

Contact details will be given upon request.

## UI Designer / Game Jams

2022, REMOTE

I collaborated with developers and artists to create two games that are now published. I was responsible for rapid prototyping and designing the UI.

I created the **intro screens, menus, and HUD** for both games.

## STUDIES

### UX design and Requirements analytics / Chas Academy

SEP 2021 – NOW, STOCKHOLM

Chas Academy is a higher vocational university that, amongst other things, taught me about:

- Design processes
- Interview techniques
- Agile working methods
- HTML & CSS

This education really improved my **critical thinking** and **problem solving skills**, as I worked on several cases and tried out many different **working methods**.
