AWARDS

Cambridge Advanced
English / Diploma
JUNE 2018

IT Award / Diploma
JUNE 2017
I was chosen as the
best IT student

ABOUT ME

I'm a curious being who always wants to learn more. Prototyping is my favourite part of design – from creating lo-fi wireframes to interactive prototypes.

These last years I've worked with both UX and UI, and learnt that I enjoy both. I'm thrilled to develop my skills as an all around UX & UI Designer in my future role.

WORK EXPERIENCE

Visuals and UX Designer / Bantaba

SEP 2021 – AUG 2022, STOCKHOLM (Hybrid)

As the sole designer for Bantaba, Africa's largest startup-diaspora community, I played a crucial role in the overall design process.

- I designed the **landing page** and parts of the **platform** based on my conducted **research**
- I designed and coded **emails** which were sent out to 500+ users
- I produced weekly **social media** graphics
- I designed physical **flyers** for distribution at events

These tasks taught me how to take ownership of a project and deliver high-quality results in a fast-paced environment.

Reference:

CEO at Bantaba

Contact details will be given upon request.

UI Designer / Game Jams

2022, REMOTE

I collaborated with developers and artists to create two games which are now published. I was responsible for rapid prototyping and designing the UI.

I created the **intro screens**, **menus**, and **HUD**.

STUDIES

UX design and Requirements analytics / Chas Academy

SEP 2021 – NOW, STOCKHOLM

Chas Academy is a higher vocational university. The school has, amongst other things, taught me about:

- Design processes
- Interview techniques
- Agile working methods
- HTML & CSS

This education really improved my critical thinking and problem solving skills, as I worked on several cases and tried out many different working methods.
